THE attention of the public is called to the advantages of insuring their property in the above Company, established on the 18th October, 18th, for the mutual indemnification of its members, under certain limitations, against loss or damage by fire.

In addition to the recent alterations in the Deed of Settlement, among the most important of which may be considered the repeal of the Average Clause.—the Directors, encou-

ant of which may be considered the repeal of the Average Clause,—the Directors, encour-raged by the uninterrupted success that has hitherto attended the operations of this Company, and which has fully borne out the expectations of the founders thereof, as to the soundness of its principles, have, in virtue of the powers vested in them, reduced the rate of Entrance Fee from † per cent to ten shillings only, upon every policy; and have also de-cided upon making a return of premium upon the renewal of policies, as specified below.

ADVANTAGES OF INSURING IN THIS

enrich bodies of absent proprietors in the mother country.

Finally, while directing the attention of the public to the advantages, it may not be improper to state, that under a continuance of favourable auspices for a few years, such as have hitherto attended this company, and with a rapidly accumulating fund, the expense of insuring will be very trifling to those who continue insurers.

Sydney Morning Werald.

MONDAY, NOVEMBER 2, 1846.

Buern to no master, of no sect am I.

THE NEWS FROM ENGLAND. We received quite unexpectedly, on Saturday afternoon, English news to the 1st July, and as it embodied the highly important intelligence of the retirement of the Page ministry, we published, with as much speed aspossible, an extra sheet containing as ample a supply of news as our bury and Nepean Rivers respectively.

The results of your deliberations during the "That a Provisional Committee be now short period of your being assembled, with

but it was circulated among our town, subscribers by an early hour in the even-ing, and through the kindness of the Hunter River Steam Navigation Company we were enabled to forward copies to the Hunter River district by that evening's packet. The remainder of our sub scribers will receive their copies with this morning's paper.

MUNICIPAL ELECTIONS. This day is fixed by the Act of Council for the election of members of the City Council, and we regret to say that the apathy which has so long disgraced the citizens still continues to exist. No one can mix in general society, without hearing repeated complaints of the proceedings of the cor-porate body; and yet there are hundreds of citizens who have never taken the trouble even to record their votes, and it is these even to record their votes, and it is these ment, founded upon actual inspection, men who are generally the loudest in their complants.

Ment founded upon actual inspection, and upon a deliberate consideration of all circumstances, as to which complants.

In Cook Ward the candidates are Mr.

MILLIAM MOIR, and Mr. John Kellick, Mr. Moir's pretensions are so much superior to those of Mr. Kellick (or perhaps the more correct assertion would be Committee shall have reason to think Mr. Moin's pretensions are so much su-perior to those of Mr. Kellick (or perhaps the more correct assertion would be that the former has considerable pretentation to the office, and the latter has none) that we can hardly imagine it possible that the electors can stultify themselves by passing Mr. Mora by. But, if as is usual in Cook Ward, about one-half the electors neglect to vote, it is impossible either form itself into a Company,

to say what may be the result.

In Phillip Ward, Mr. Bownen, long known as a respectable ironmonger, and Mr. THOMAS MAY, of the Sportsman's Arms, are in the field. Between these candidates there can be no hesitation among those who know them, and are really anxious to do their duty to the city. Mr. Bownen is so immeasurably superior to his opponent, that he ought to be elected by a large majority; but from local feeling, it is expected the contest will be a sharp one, and that the most active candidate will be successful.

In Bourke Ward, Mr. Dayes, who has been several years in the Council, expected to be re-elected without opposition, but on Saturday, without a survey there can be no railway Mr. WILLIAM MOFFITT was put in nomination. What peculiar claims Mr. Moffitt has that he should oust Mr. Driver we are at a loss to consider, indeed our opinion is that putting him forward is a mere publican's ruse to prevent the election from passing over without opposition, and consequently without that guzzling which has been carried to such a lisreputable extent in former years.

In Brisbane Ward, where there are two vacancies, there are only two candidates, Messrs. Owen and Rosey. The poll will be open to decide which of these gentle-men shall remain longest in the Council. In Macquarie Ward, Mr. George Hill. the retiring Councillor, will be re-elected

without opposition.
In Gipps Ward, Mr. DANIFL EGAN is unopposed, it is therefore useless to say anything respecting him.

Having thus shown the state of each Ward, we have only to add, in conclusion, that we trust that in those Wards where there is any contest every elector will go to the poll; let us have the opinion of the citizens fairly expressed, and we shall be satisfied, whatever may be the result; and let those who do not vote, remember that whatever may happen, how gross soever the conduct of the City Council may be, they have no right to com-plain, seeing that they will not take the least trouble to use that power which the Legislature of the colony has confided to them; and that they thus are in a great measure responsible for the evils that may accrue from their culpable neglect.

THE RAILWAY MOVEMENT.

WE are glad to perceive that the Railway Provisional Committee are making some progress. An advertisement announces that they are ready to receive applications from gentlemen willing to und survey of the proposed lines to the southward and westward. The funds now a their disposal, including the assistance promised by the Government, are esti-mated, we understand, at from £800 to mated, we understand, at from £800 to £1000, the amount of subscriptions up the country not being exactly known. This, of course, is wholly insufficient to meet the expenses of a finished survey; but the Committee are anxious to employ the money, as far as it will go, in obtaining such a preliminary survey as may enable their constituents to judge which would be the best line, and to estimate the extent of energine price difficulties that would be specified and a preliminary survey as may enable their constituents to judge which would be the best line, and to estimate the extent of energine price difficulties that would be presented to him that as the subject was not to be considered that as the subject was not to be considered that as the subject was not to be considered that as the subject was not to be considered that as the subject was not to be considered that as the subject was not to be considered that as the subject was not to be considered that as the subject was not to be considered that as the subject was not to be considered that as the subject was not to be considered that as the subject was not to be considered that as the subject was not to be considered that as the subject was not to be considered that as the subject was not to be considered to him that as the subject was not to be considered that as the subject was not to be considered that as the subject was not to be considered that as the subject was not to be considered that the same subject would be presented early in that as the subject was not to be considered that as the subject was not to be considered that as the subject was not to be considered that as the subject was not to be considered that as the subject was not to be considered that the same subject would be presented early in that as the subject was not to be considered that the sensing seasion, the ensuing session, the casum proposed would be presented early in that as the subject was not the same subject would be presented early in that the same subject would be presented ear

such survey to be made whenever the shall deem the amount subscribed sufficient to meet the necessary expense; and that they do report to a Public Meeting to be hereafter held."

The powers of the Committee are here clearly restricted to the collecting of sub-scriptions, causing a survey to be made, scriptions, causing a survey to be made, and reporting to a public meeting. They have no power to determine what lines shall be ultimately adopted; and for this very sufficient reason, that the public meeting itself had no such power: and what it did not itself possess, it could hardly delegate to others. All the Committee can do, is to employ competent persons to examine the country between persons to examine the country between the intended termini, leaving those persons to form their own unbiassed judgline presents the least amount of do? It can only do one of two things: either form itself into a Company, and, as such, determine upon what line its capital shall be embarked; or, pass a declaratory resolution as to the line it would recommend.

The Parramatta Committee must per-

ceive, then, that any such pledge as they stipulate for is utterly out of the question. They will perceive, too, on reflection, that were all the towns and districts between the termini to act in the same spirit, there would be an end either to all chance of a subscription, or to all possibility of an enlightened, honest, bond fide survey. The only rational view, as it seems to us, under country can come forward with contri-bution to the survey fund, is this-that where they may, railways will be of such immense advantage to the colony, that it is to the interest of all parties having a stake in the colonial welfare to promote

stake in the colonial welfare to promote their introduction.

PROROGATION OF THE LEGISLATIVE COUNCIL.

In accordance with the notice given by the Colonial Secretary on the previous day, the Council met at 12 o'clock on Saturday, to conclude the business of the session, and to be prorogued by his Excellency. A large number of ladies and gentlemen attended in the body of the house to witness the ceremony, and the gallery was also well filled. Outside, the gathering of the spectators was not numerous. Many of the country members having gone into the interior to attend to their pastoral pursuits, the attendance of members was but thin. At 12 o'clock the Speaker took the chair.

INSOLVENT ESTATES ADMINISTRATION SILL.

The SPEAKER reported that his Excellency had been pleased to assent, on the part of Her Majesty, to the Insolvent Estates Administration Bill.

TRANSPORTATION,

The COLONIAL SECRETARY laid upon the table a return moved for by Mr. Wentworth relative to the expense per head of convicts.

REVIVAL OF TRANSPORTATION.

Mr. WENTWORTH begged to bring up and lay upon the table the Report of the Committee appointed to inquire into and Report upon the despatch of Mr. Gladstone, Secretary of State for the Colonies, on the subject of the renewal of Transportation to New South Wales. He should also move that the Report, with the Evidence, be printed, with a view to its distribution during the recess to honorable members as well as to the public, in order that they might have time fully to weigh and consider the very important propositions involved in the Report. (Hear, hear).

ABORIGINES,

On the motion of Mr. WINDEYER, the re-

In now taking leave of you for a season, have to thank you in Her Majesty's name, for the liberality with which you have voted the supplies for enabling me to carry on the service of Government; and I especially deem it my duty to express my gratification at the readiness with which you agreed to the supplement in schedule A, for the Expenses of the Administration of Justice, I hope, however, that it may not be necessary to avail myself of this supplement, as I find there is at present an unexpended balance on schedule B, which can be expended basace on schedule B, which can be made applicable to the purpose, and until the whole of that balance is expended, it is not my intention to take advantage of any part of the additional fund which you have so liberally placed at my disposal.
CHARLES A. FITZ ROY.

October 31, 1846. His Excellency came to the House in the usual state, and appeared in excellent health, and his deportment exhibited the most marked cordiality towards the membersof the

Council.

His Excellency's address containing no express words of prorogation—the Speaker again took the chair on His Excellency's departure, and the House having no business before it, he remained there till the Council was counted out.

1. Persons insuring in the Imperial Insurance Company, enjoy the following important advantages:—

1. Persons Sucurity. The large amount of the paid up and invested Capital of the Campany, (upwards of One Million Five Humber Thousamp Poursus Brizaling), the weelth and respectability of its Sharsholders, afford the most perfect guarantee to the public of its stability.

2. Valid Policius—In order to give the most perfect guaranty to the public of the validity of the policies granted by the Sydney Branch, the Agents are anabled to state that they are now in passession of special powers from the London Directors, to affix to each policy the names of any three of their number (to be selected by the assured), which number is binding on the Company under the Deed of Settlement: thus making the policies issued here as valid and effectual as if granted at the Head Office in London.

3. Repoche Panatuws.—Considering the amount of security possessed by partice insuring in this Company; the classification of the Buildings; and the absence of any liability by the assured; the premiums charged by this Office are less than have ever before been offered to the colonial public.

4. Promyt Advisation and instructed to that effect, all losses arising under their Policies will be promptly adjusted and paid in Sydney.

NOVELTIES OF THE SEASON,

And in speaking of the novelties of the season, it is really marvellous to find how exhaustless the ingenuity of man is to furnish the fair creation with materials to adorn their persons: for every shipment brings with it some new offering to their taste, and it is even still more marvellous the low prices at which these can be procured; so low, indeed, that thousands and tens of thousands can now afford to purchase what in ancient times was to be found only in the wardrobes of the wives and daughters of kings and nobles; nay—even more beautiful and more graceful fabrics than their luxury could command. The following are a few of the matchless attractions which the BEE HIVE now presents.

Many thousand yards of fancy striped tartan, checked, and French brocaded Silks, Sarius, &c., for dresses, which by a rare piece of good fortune have been bought trenty-free per cent. below their value, and will be sold accordingly.

In these departments will be found every class of goods belonging to them. C. N. and Brother have taken very particular care to procure through their London agent the best makes, and also to procure every article required. With reference to the price, those who have purchased at the Bee Hive do not require to be told that they are cheaper than any others in this part of the world.

It were idle, indeed, to attempt to convey an idea of either the beauty or cheapness of the infinite variety of materials designs, colours, and patterns, that are to be found in this extablishment. Suffice it to say, that here is concentrated all that the richest taste could wish—and all that can satisfy those who desire to blend economy with fashion.

SELTERS WATER.

SELTERS WATER.

THE undersigned beg to call the attention of their friends and the public to the above, as a natural soda water, infinitely superior in salubrity and capability of relieving thirst to the artificial soda water, so largely consumed in this semi-tropical citnate. The carbonic acid gas to which both owe their exhilirating effect, is contained in great abundance in the selters water, but in such an intimate state of combination, that instead of distending the stomach by its sudden escape from the water in which it is dissolved, gently and gratefully stimulates it in its slow and gradual evolution, thereby promoting digestion, while the great objection to the factitious soda water is the great injury which it is known to inflict upon the stomach and digestive organs.
